

Interval

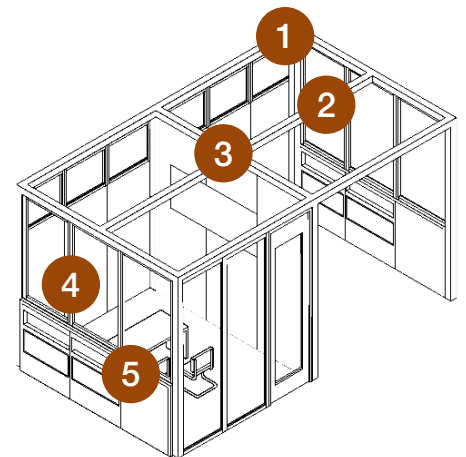

Smart infrastructure. Create the space you need where you need it.

Interval

Interval® is our post + beam architectural framework and technology infrastructure that accommodates data, power, lighting, HVAC and even water. Add or move walls, doors or ceilings when you need to. Anodized aluminum posts and beams with acoustical and glazed walls let you create inspiring and functional spaces.

- Interval integrates walls, systems, utilities and furniture components in a single, modular package
- posts connect to adjoining beams to form 90-degree configurations throughout the workspace
- all cabling routed simply and invisibly via posts and beams
- more accurate budgeting and efficient use of trades
- additions and updates require minimal demolition and deconstruction
- pre-fabricated components minimize construction waste
- 98% recyclable

- 1 route cabling simply and invisibly via posts and beams
- 2 hang light fixtures, monitors and more from beams
- 3 accommodate data, power, HVAC, even sprinklers
- 4 integrate walls with post + beam
- 5 create a private office
